

*Fundamentals of Compressed Air Systems Presented at The Roberts Centre in Wilmington, Ohio*

IAC Energy Management and DP&L presented [Fundamentals of Compressed Air Systems](#) on August 29, 2017 in Wilmington, OH. Through this workshop, the Compressed Air Challenge® helps companies become more profitable by getting smarter about compressed air. The course, which was offered to a target attendance of eighteen, was designed to enable participants to evaluate their own systems and apply proven techniques to achieve higher productivity, reduced downtime, greater energy savings, increased product quality, and greater efficiency.

The Instructor, Mr. David Booth, a Systems Specialist with Sullair Corporation, holds a degree in Engineering from the University of Notre Dame and brings over 20 years of experience in the design, maintenance and installation of mechanical and electrical systems. The primary focus for this workshop is to train and support others to improve the efficiency of compressed air systems, providing end-users with customized solutions to their compressed air issues.
